Education

G. H. Raisoni College of Engineering

Bachelor of Engineering in Computer Science (CGPA: 8.64 / 10.00)

2024

Nagpur, Maharashtra

Experience

The Factual Holding Co.

Frontend Developer

Feb 2026 – Present

Remote

- Led frontend development of a proprietary trading platform, delivering real-time dashboards that enabled traders to execute orders, monitor positions, and track live PnL for faster, data-driven decisions.
- Built an affiliate platform that enabled 1,000+ user onboardings with referral attribution, commission management, and performance dashboards, improving partner acquisition and engagement.
- Integrated PostHog and Microsoft Clarity, implementing event tracking and user funnels to analyze user behavior, optimize conversion paths, and drive data-informed product improvements.

The Alter Office

Associate Frontend Developer

Sep 2024 – Jan 2026

Bengaluru, India

- Laid the foundation for a production-grade AdTech platform by architecting a scalable Next.js monorepo with Turborepo, reusable UI components, Storybook, and automated CI/CD pipelines using GitHub Actions and AWS.
- Developed the platform's Supply-Side Platform (SSP), Demand-Side Platform (DSP), and Admin Portal, enabling 100+ publishers to monetize inventory and advertisers to manage campaigns through a unified AdTech ecosystem.
- Optimized data fetching with React Query for a candidate assessment platform used by thousands of aspiring professionals, improving application responsiveness and user experience.

Remostart

Frontend Developer Intern

Jan 2024 – Jun 2024

Remote

- Delivered customer-facing features across AI, HR, and supply chain platforms using React, Next.js, TypeScript, and Tailwind CSS.
- Boosted application performance by 35-40% through rendering optimizations and efficient API handling, improving page speed and Core Web Vitals.

Projects

Dropsei | [Next.js](#), [WebRTC](#), [WebSocket](#), [PNPM Workspaces](#) | [Live Demo](#) | [GitHub](#)

- Built a peer-to-peer file transfer platform that sends files directly between browsers using WebRTC DataChannels, eliminating server-side file uploads and storage.
- Implemented WebSocket-based signaling, room-based connections, QR sharing, chunked file streaming, transfer progress, and DataChannel backpressure for reliable large-file transfers.

Pinsei | [React.js](#), [TypeScript](#), [Supabase](#), [Tailwind CSS](#) | [Live Demo](#) | [GitHub](#)

- Built a bookmark manager supporting 5,000+ stored links with instant search, collections, and optimistic UI updates for a fast, seamless browsing experience.
- Developed a scalable Next.js frontend using reusable UI components, efficient state management, and Supabase-powered real-time synchronization to deliver a responsive user experience.

Technical Skills

Languages: JavaScript, TypeScript, HTML5, CSS3

Frontend: React.js, Next.js, Astro, Tailwind CSS, GSAP, Framer Motion, shadcn/ui

Backend & APIs: Node.js, Express.js, Supabase, Firebase

State Management: Redux, Zustand, TanStack Query

Databases: MySQL, MongoDB

Testing & Tools: Vitest, Playwright, Git, GitHub Actions, Storybook, Turborepo

Core Expertise: Frontend Architecture, Performance Optimization, State Management, Component Libraries, Design Systems
